

The Henley Plan for the N.C. House District 75

MEMORANDUM

FOR: The Citizens of the N.C. House District 75

FROM: Gardenia Henley Diplomat/Inspector General Officer/Ret.

SUBJECT: **THE HENLEY PLAN**

DATE: December 17, 2019

As the N.C. State Representative, for the 75th District, I will always inform the citizens of my District what my plans are and my monthly developments.

I will support economic growth in North Carolina. I have the award winning and proven experience, both national and international credentials to grow and boost any economy. Based on my award winning experience, I will initiate legislation that will bring jobs into North Carolina that will stay and benefit everyone. This is but one of the assets that I bring to this great state which are different from past and current Representatives. Furthermore, I want to support economic growth for the companies that are already based in this District.

I will not squander your tax dollars, and you will not have to second guess my motives. My background as an Inspector General Officer speaks for itself. I have been fighting for your tax dollars for over three decades. I have an undisputed record of success, fighting Fraud, Waste, Abuse and Mismanagement. I am a decorated Veteran of the U.S. Air Force. I support our veterans and I will fight for our veterans wholeheartedly. I advocate that no veteran should fight in a foreign war, come home, and have to fight for their benefits.

A major part of my platform is to create an environment in our District where the citizens and residents will recognize that all communities, businesses, companies and corporations play an important role in North Carolina. I am the only candidate appointed and commissioned by former U.S. President Bill Clinton and Secretary of State Madeline Albright. I am the only candidate who has served in the U.S. Military. The citizens of the 75th District in North Carolina must be treated with respect, compassion and with equal justice. For more information about me, please visit my website at:
